Email: sindre@sindrejohansen.no
Born: 6. July 1990
WWW: http://www.sindrejohansen.no

EDUCATION

August 2010 – July 2015
Master in Computer Science   Norwegian University of Science and Technology
Specialized in Artificial Intelligence

EXPERIENCE

Januar 2013 – present
Owner/Developer   Sindre Ilebekk Johansen
I have my own firm where I develop software as a consultant. Mostly continuing what I did for Asker Kommune, but I also host a internal tool for another company.

Jun 2014 – August 2014
Software Developer Summer Intern   Telenor Digital
Development of an Android application. Developed both the android code, and a simple backend using Python and Django.

January 2014 – May 2014
Part Time Software Developer Intern   SINTEF
Developed an internal tool. Frontend in both Android and Javascript. Backend using Python and Django.

Jun 2013 – August 2013
Software Developer Summer Intern   Telenor Comoyo
Working with video streaming services. Programming in Python, deploying on Amazon Cloud Services.

January 2013 – Jun 2013
Part Time Software Developer Intern   Telenor Comoyo
Working with tasks connected to the video streaming service. Backend programming in Java.

Summer of 2011 and 2012, Christmas 2011 and some part time fall of 2012
User support and Software Developer   Asker Kommune
I have worked some summers at Asker Kommune. There I have worked as user support for internal IT-systems but also developed a few internal tools they still use, using Python and Django. I continued working as a part time developer at the fall of 2012.

Voluntary

August 2010 – present
Developer and Technician   StudentTV, part of the Student Society in Trondheim
From January 2011 till January 2012 I was the lead developer for the new website for StudenTV, that later became dusken.no. From January 2012 till December 2012 I was the Technical Chief at StudentTV and led the Technical department of 10 persons.

April 2011 – December 2011
Techical Manager for the live Video Production   UKA 2011
At UKA-11 I was responsible for the technical side of the live video production at the two big scenes. I was responsible for 21 productions over 4 weeks.

SKILLS

I have a passion for programming. I love see something I create come alive on the screen, and I love to see other use what I have created. Of all programming languages, I know Python best and I love to work in that language. However I also have experience other languages, such as Java, Javascript, C, C++, Delphi, HTML and CSS. I am a fast learner, and I love to try out new languages, tools and paradigms. I never let the lack of knowledge or experience stop me from doing an interesting task.

Languages: Norwegian, English.

INTERESTS

I spend my time working voluntary as a software developer in Student-TV. I also work with our live video productions, both on the technical and the artistic side

When I am not working with Student-TV I like building and flying QuadCopters or just taking a bike ride.
